**QUALITATIVE REQUIREMENTS OF CYBER FORENSIC &  
AUDITING TOOLS FOR CREATION OF CYBER LAB**

S N	Parameter	Specifications
<b>A) WORK STATION FOR STATIC BENCH</b>		
1	Processor CPU	2 (Dual) Intel XEON Processor Silver 4110 8Core 2.1 GHz 11 MB Cache or latest.
2	RAM	Minimum RAM 128 GB and upgradable upto 768 GB
3	HDD -Internal	<ul style="list-style-type: none"> <li>• OS Drive: 512 GB M.2 NVMe PCIe Solid State Drive - Pro Series or higher</li> <li>• Drive 2 - SATA Interface: 512 GB SATA Solid State Drive - Pro Series or higher</li> <li>• Drive 3 - USB 3.1 Interface: 4 TB 7200 rpm SATA Hard Drive or higher</li> <li>• (RAID Drive as per the user requirement)</li> </ul>
4	Computer case	ATX Server Case as per end user requirement with inbuilt write blockers, HDD, bays and with hot swappable capabilities.
5	Power supply	1200 Watt Modular power supply ATX or better
6	Main board	Intel chipset motherboard which supports user defined processor, RAM and other components.
7	Graphic card	As per user requirement.
8	Optical Drives	As per user requirement.
9	Forensic Bridge	Forensic Universal Bridge USB3.0 &PCIe &SATA &FireWire &IDE &SAS incl. all user mentioned cables and adopters having latest technologies as per end user requirement.
10	Display	As per user requirement.
11	Software	As per user requirement.
<b>B) IMAGING / CLONING DEVICE</b>		
1	Imaging Cloning Device	Portable kit which contains a complete family of hardware write blockers along with adapters and connectors
2	Connectors	IDE/SATA/SAS/USB3/Fire Wire/PCIe
3	Connectivity	All connectivity on Host side should be USB3 or better
4	Memory card reader	02 (one for read and other read-write) or better
5	Power supply	Cable and adapters

*Handwritten signatures and initials at the bottom of the page.*

S N	Parameter	Specifications
6	Specifications	<ul style="list-style-type: none"> <li>• High performance, reliable, and easy to use forensic duplicator - with a high resolution, touch screen User Interface (UI) or better.</li> <li>• It should support forensic imaging of SATA, USB 3, PCIe, SAS, Fire Wire 800, IDE, and network shares or better.</li> <li>• Outputs to SATA, USB 3, SAS, and network shares or better.</li> <li>• Supports up to two active forensic jobs at a time (simultaneous imaging) or better.</li> <li>• Supports up to four destinations per source with the ability to mix clone/image duplication and local/network destinations or better.</li> <li>• Job queuing option for efficiency and convenience or better.</li> <li>• Disk-to-File Duplication (Compressed .e01 &amp; .ex01), Disk-to-Disk Duplication (Cloning), Compute Hash Values, Verify Hash Values, HPA/DCO Disable, Blank Check Drives, Format Drives, Wipe Drives, Display, Print, and Save Logs, Secure User Profiles or better.</li> <li>• High-resolution, color touch screen user interface, used to control and monitor ongoing operations wizard driven UI uses simple touch gestures to select and initiate all functions or better.</li> <li>• Supports collecting data in a forensically sound (a.k.a. "write-blocked") manner or better.</li> <li>• Network based forensic acquisitions, remote triage applications, or network based "write blocking" or better.</li> </ul>
7	Adapters & cables	<ul style="list-style-type: none"> <li>a) mSATA / M.2 to SATA Adapter Kit</li> <li>b) Blade Type SSD Adapter</li> <li>c) SATA LIF Adapter</li> <li>d) micro SATA</li> <li>e) 1.8" IDE Laptop Adapter</li> <li>f) 2.5" IDE Laptop Adapter</li> <li>g) ZIF IDE Adapter</li> <li>h) PCIe Card SSD Adapter</li> <li>i) PCIe M.2 SSD Adapter</li> <li>j) PCIe Apple SSD Adapter</li> </ul>

*[Handwritten signatures and marks at the bottom of the page]*

S N	Parameter	Specifications
		k) Thunderbolt to Firewire Adapter and USB C to USB Cable for Mac acquisition. or Any other adopter and cables required by the user.
8	Water resistivity	All of content of the kit should be skilfully bundled in a rugged pelican waterproof case perfect for field or lab acquisition.
<b>C) FARADAY BOX</b>		
1	The patented industry standard for forensics visual and hands-on interrogations.	
2	Provides maximum isolation from all UMTS mobile device bands.	
3	Provides maximum isolation from Wi-Fi signal sources including 802.11a/b/g/n/ac.	
4	Features the latest GEN-2 custom RF gasket system.	
5	Features the latest GEN-2 custom RF absorbent and reflective foam liner.	
6	Large RF shielded viewing window for visual real-time confirmation of device displays and functions.	
7	Dual RF shielded silver mesh tactile gloves for hands-on access to devices.	
8	Built-in internal LED illumination.	
9	Built-in RF filtered AC power strip.	
10	High speed USB2.0 data interface.	
11	Forensics tamper-proof hardware and a dual pad-lockable latches prohibits unauthorized access and maintains the chain of custody.	
12	Universal removable I/O panel customizable for your specific applications.	
13	Features	Designed for lab and bench visual forensics interrogations Patented design RF tight hands-on access to your device RF tight illuminated viewing of your device 1/2" GEN-2 high efficiency RF foam liner GEN-2 high efficiency RF gaskets Exclusive double lip RF seal Universal removable I/O panel

S N	Parameter	Specifications
14	Connectors	RF isolated 6-outlet 110VAC power strip RF isolated 6-pole feed-through terminal block RF isolated USB2.0 high speed interface
15	Isolation	>90dB @ 918MHz >85dB @ 2.4GHz >80dB @ 5.8GHz
D)	FLAME PROOF LOCKER	
1	Capacity	Minimum 60 L
2	Locking System	Lever high security Cylindrical Locks. Snap shut mechanism
3	Certification	Data protection as per IS: 14562 for 1 hour fire endurance and 1 hour fire & impact test.
4	Total Memory slots	Designed as per UL-72 Class 125 specifications for 1 hour rating.
5	Type	Flame Resistant
E)	MOBILE FORENSIC SOFTWARE_(as per user requirements)	
	Mobile forensic software contains:- 1. UFED 4 PC/Touch 2 2. MSAB XRY 3. MD NEXT and MD RED 4. Oxygen Forensic 5. Mobile edit forensic express pro or any other /additional latest available software and add on modules as per user requirement.	
F)	PORTABLE FORENSIC WORKSTATION	
10	Connections	a) HDMI Port b) Display Port 1.4 over USB 3.2 Gen 2 (Type C) c) USB 3.2 Gen 2 Ports (Type A) d) USB 2.0 Port (Type A) e) Headphone jack (2-in-1) Headphone/S/PDIF Optical) f) Microphone jack g) Line-In jack h) Line-out jack i) RJ-45 Port j) DC-in or any other ports required by the user

S N	Parameter	Specifications
11	Software	As per user requirement
12	Forensic Imaging Tools	As per user requirement
<b>G)</b>	<b>WRITE BLOCKER KIT</b>	
1	Portable kit which contains a complete family of hardware write blockers along with adapters and connectors for use in acquiring a forensically sound image of virtually any hard drive or storage device	
2	Includes USB 3.0 IDE/SATA, SAS, USB3, FireWire, Forensic Card Reader, Two Power Supplies, Cables and Adapters.	
3	USB 3.0 to IDE+SATA	
4	SAS	
5	USB 3.0 to USB 3.0	
6	FireWire	
7	FCR	
8	Power supply with line cord	
9	IDE signal cable 8"	
10	IDE signal cable 2"	
11	SATA signal cable	
12	3M to Molex Power Cable	
13	3M to SATA Power Cable	
14	SAS integrated signal and 3M power cable	
15	USB-A to 5 pin Mini-B	
16	USB 3.0 A to B cable	
17	FW800 Cable 9p-9p	
18	FW800 Cable Adapter 4p-9p	
19	FW800 Cable Adapter 6p-9p	
20	Hard Drive Adapter 2.5"	
21	Hard Drive Adapter 1.8"	
22	ZIF Hard Drive Adapter	
23	Micro SATA Adapter	
24	SD Micro and Mini Memory Card Adapters	
25	Rugged case with custom foam insert	

*[Handwritten signatures and initials at the bottom of the page]*

S N	Parameter/Specifications
H)	<b>DATA EXTRACT AND DECODE SOFTWARE FOR NON-STANDARD MOBILE PHONES</b>
1	Should be all-in-one mobile forensic system.
2	Should combine both mobile phone logical and physical solution in one package
3	Should allow investigator full access to all the possible method to recover data from a mobile device.
4	Should be software based solution, complete with all necessary hardware for recovering data from mobile device in a secure manner and go deeper in to a mobile device to recover vital data.
5	Should have a combination of logical and physical analysis tool available for supported device.
6	Should produce a combine report containing both live and deleted data from the same handset.
7	Should perform simultaneous operations like extraction, decoding and analysis, on a single platform.
8	Should include multiple mobile phone extraction capability simultaneously at-least up to 3 devices.
9	Should be able to recover deleted data e.g. contacts, image, SMS, emails, VOIP Call Data, video, GPS locations etc.
10	Should be able to decode mobile Apps such as Viber, WhatsApp, Skype, Facebook messenger, QQ, etc.
11	Extraction should support acquisition of internal memory and removable media.
12	Extract data from variety of non-standard mobile devices including Chinese Chipsets.
13	Should generate hex-dumps from the phone memory, typically by bypassing the device operating system.
14	Physical extraction allows users to generate hash values of the memory image, as well as individually decoded files.
15	Should support GPS Device Physical extraction and Examinations.
16	Should have Triage Mode.
17	Should allow search of data either by specific parameters or open text.
18	Should able to clone SIM cards Mini/ Micro/ Nano.

*[Handwritten signatures and initials]*

S N	Parameter/Specifications
19	Should have Write Protected Universal Memory Card Reader.
20	If should automatically generates an audit trail of the forensic process for peer review.
21	It should recover VOIP call data, GPS mapping information and instant messaging logs.
22	Should have Report Generator to generate and customize reports in different formats e. g. PDF, HTML, XML and Excel.
23	Product Offered should be of International Repute & Brand.
24	Should extract and decode data from non-standard mobile devices.
25	Able to extract evidence from mobile device where a screenshot is the only way to capture relevant evidence and help validate device extraction results.
26	Should have viewing capabilities: Geographic view, Chat view, Timeline view and Connection view.
27	Zoom in or out to focus analysis on any point in time using the Timeline view.
28	Navigate data by location. Find places of interest and investigate the data connected to those places - such as calls made or received, pictures taken and more using Geographic view.
29	Track chat threads from different apps such as WhatsApp, I Message, Facebook messenger and others using Chat view.
30	Discover and investigate the interactions between different device owners and accounts using Connection view.
31	Indian Distributor/ Reseller/ Bidder should have OEM trained manpower for training of the product.
