Draft QRs/TDs of Working Line Breeding Stock of Labrador Retriever

S/N	QRs	TDs	Vendor's comments
1.	<p>General Requirement</p> <p>The breeding stock of the dogs is required for dual task of detection and patrol. The potential dog breeding stock should be from either of the following sources:-</p> <p>a) Established Police / Military Working Dog centres of foreign countries.</p> <p>b) From open market of foreign countries.</p> <p>c) From open market within India.</p>	To be ascertained by the BOOs.	
2.	<p>General appearance:-</p> <p>Strongly built, Medium sized short coupled and well advanced confirmation.</p>	It will be ascertained by BOOs during visual inspection.	
3.	<p>Distinguishing characters:-</p> <p>Otter tail, Short dense, weather resistant coat, clear cut head with broad back skull and moderate stop.</p>	The otter tail to be confirmed by BOOs and ascertained that tail is very thick at the base, gradually tapering toward the tip, of medium length and extending no longer than to the hock. The tail should be free from feathering and clothed thickly all round with the labrador's short, dense coat, thus having that peculiar rounded appearance that has been described as the "otter" tail.	
4.	<p>Height, Weight and Colour:-</p> <p>(i) Height Male - 21 - 25 Inches Female - 20 - 24 Inches</p> <p>(ii) Weight Male - 20 - 30 Kg Female - 18 - 28 Kg</p> <p>(iii) Colour Black, Yellow & Chocolate</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOOs will ascertain weight of Dog by digital weighing machine as far as possible.</p> <p>(iii) BOOs will confirm the colour during visual inspection.</p>	

5.	<p>Age :- In case of import maximum age is 36 months whereas, in case of local procurement maximum age is 24 months.</p>	<p>In case of local purchase, BOOs will ascertain the age of dog from KCI certificate or any other KCI affiliated Kennel clubs. Whereas, in case of import, firm to provide certificate from respective Organisation to ascertain the age. In addition, dentition of animal and other age mile-stones will be determined by the Vet Officer.</p>	
6.	<p>Working traits:- i) The personality and behaviour traits of dogs should comprise of affability, confidence control aggression, environment stability, physical and social engagement. (ii) The dog breeding stock should qualify K9 BAT (Behavioural Assessment Test). iii) In case of import, Dogs from open source must be IPO/ IGP/NVBK / KNPV/ Schutzhund certified/similar certification of international repute. iv) In case of local purchase from India, working traits should be determined by BOOs through K-9 BAT. (v) In case of import, the male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>i) & ii) Behavioural traits will be ascertained by BOOs through K9 BAT. (iii) BOOs will check IPO/IGP/NVBK/KNPV /Schutzhund certification etc. It is mandatory at the time of purchase to ascertain the quality of dogs to be purchased. (iv) BOOs will ascertain through K9 BAT. (v) BOOs will check records of the breeding organisation. Firm to provide such verifiable records before the BOOs.</p>	
7.	<p>Faults:- Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide:- (a) The extent to which it deviates from the standard. (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>BOOs will examine the dog Visually, Physically, Medically and other documentary evidences / Medical records to ascertain there is no fault.</p>	
8.	<p>Veterinary Examination:-The dog should be veterinary sound.</p>	<p>Vet Officer of BOOs will ascertain soundness.</p>	
9.	<p>Vaccination and Miscellaneous Health Issues</p>		

(i) The pedigree of previous three generations should be provided by vendor and user should compare and analyse with already held breeding stock to ensure that dogs are not in-bred in any way.

(ii) The breeding stock should be free from genetic diseases which comprises of hip dysplasia, elbow dysplasia, hereditary epilepsy and progressive retinal atrophy etc. The vendor should guarantee for minimum 6 (Six) months regarding any of the above mentioned genetic disorders and replace the dog with similar specifications in the event of any of these genetic abnormalities surfaces during this period. This replacement should be free of cost except transportation cost which is chargeable based on actual expenditure.

(iii) The breeding stock should be duly immunised against common canine infectious diseases and apparently free from infectious & contagious diseases which comprises of Canine Parvo, Distemper, Hepatitis, Leptospirosis, Corona, Para-influenza and Rabies.

(iv) The breeding stock should be free from any genital diseases like metritis, ovarian / uterine cysts, mastitis, vaginitis, pyometra in case of female dog and cryptorchidism, inflammation of testes, phimosis, paraphimosis, priapism in case of male dog. These dogs should also be free from any skin disorder like dermatitis, folliculitis, seborrhea, scabies, sarcoptic & demodectic mange, fleas, ticks infestation, tumour, granulomas, anal sac disease or any other fungal / bacterial infections.

(v) The clinical and laboratory examination of the candidate dogs should be carried by the vendor within previous 10 days from the date of examination from an ISO 17025 / NABL accredited veterinary laboratory

<p>with regards to complete blood count (CBC), biochemistry profile with regards to liver and kidney function tests, lipid profile and heart worm test.</p> <p>vi) Complete radiological examination for hip and elbow scores, chest radiographs and any other record to ensure that the dogs have not undergone any surgical intervention.</p> <p>vii) The dogs must comply with all mandatory quarantine norms of both exporting and importing countries.</p>

Draft QRs/TDs of Working Line Breeding Stock of German Shepherd

S/N	QR	TD	Vendor's Comments
1.	<p>General Requirement The breeding stock of the dogs is required for dual task of detection and patrol. The potential dog breeding stock should be from either of the following sources:-</p> <p>a) Established Police / Military Working Dog centres of foreign countries. b) From open market of foreign countries. c) From open market within India.</p>	To be ascertained by the BOO.	
2.	<p>General appearance -: Should be strong, agile, well muscled animal, alert and full of life. The dog is longer than tall, deep bodied and presents an outline of smooth curves rather than angles.</p>	To be decided by the BOO	
3.	<p>Distinguishing characters -: Eyes of medium size, almond shaped, set a little obliquely and not protruding, Ears are moderately pointed in proportion to the skull, open toward the front, and carried erect when at attention. Skull slopes in to the long, wedge shaped muzzle without abrupt stop. The withers are higher and sloping into the level back. The back is straight, very strongly developed without sag or roach and relatively short. Tail bushy, with the last vertebra extended at least to the hock joint. It is set smoothly into the croup and low rather than high. At rest, the tail hangs in a slight curve like a sabre</p>	To be decided by the BOO	
4.	<p>Height, Weight and Colour-:</p> <p>(i) Height Male – 23 – 26 Inches Female – 22 – 24 Inches</p> <p>(ii) Weight Male & Female – 23 – 30 Kg</p> <p>(iii) Colour – Dark, Tan, Grey and all black.</p>	<p>To be decided by the BOO.</p> <p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (withers). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOO will ascertain weight of Dog on weighing machine as far as</p>	

		possible. (iii) BOO will confirm the colour during visual inspection	
5.	<p>Age: – In case of import maximum age is 36 months. Whereas in case of local procurement, maximum age is 24 months.</p> <p>Firm to provide certificate in proof of age from respective organisations in case of import.</p>	<p>In case of local purchase, BOO will ascertain the age of dog from KCI certificate or any other KCI affiliated Kennel clubs. Whereas, in case of import, firm to provide certificate from respective Organisation to ascertain the age. In addition, dentition of animal and other age mile-stones will be determined by the Vet Officer.</p>	
6.	<p>Working traits :-</p> <p>i) The personality and behaviour traits of dogs should comprise of affability, confidence control aggression, environment stability, physical and social engagement. (ii) The dog breeding stock should qualify K9 BAT (Behavioural Assessment Test). iii) In case of import, Dogs from open source must be IPO/IGP/NVBK /KNPV/Schutzhund certified/similar certification of international repute. iv) In case of local purchase from India, working traits should be determined by BOOs through K-9 BAT. (v) In case of import, the male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>i) & ii) Behavioural traits will be ascertained by BOO through K9 BAT. (iii) BOO will check IPO/IGP/NVBK/KNPV /Schutzhund certification etc. (iv) BOO will ascertain through K9 BAT. (v) BOO will check records of the breeding organisation. Firm to provide such verifiable records before the BOO.</p>	
7.	<p>Faults :- Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>BOO will examine the dog Visually, Physically, Medically and other documentary evidences / Medical records to ascertain there is no fault.</p>	

8.	Veterinary Examination:- The dog should be veterinarily sound.	Vet Officer of BOO will ascertain soundness.	
9.	<p>Vaccination and Miscellaneous Health Issues</p> <p>(i) The pedigree of previous three generations should be provided by vendor and user should compare and analyse with already held breeding stock to ensure that dogs are not in-bred in any way.</p> <p>(ii) The breeding stock should be free from genetic diseases which comprises of hip dysplasia, elbow dysplasia, hereditary epilepsy and progressive retinal atrophy etc. The vendor should guarantee for minimum 6 (Six) months regarding any of the above mentioned genetic disorders and replace the dog with similar specifications in the event of any of these genetic abnormalities surfaces during this period. Draft QR/TDs of Working Line Breeding stock of Belgian Shepherd Malinois

Sl No.	QRs	TDs	Vendor's Comments
1.	<p>General Requirement</p> <p>The breeding stock of the dogs is required for dual task of detection and patrol. The potential dog breeding stock should be from either of the following sources:-</p> <p>a) Established Police / Military Working Dog centres of foreign countries.</p> <p>b) From open market of foreign countries.</p> <p>c) From open market within India.</p>	To be ascertained by the BOOs.	
2.	<p>General appearance :-</p> <p>Well balanced dog, stands squarely on all fours and viewed from the side, the top line, four legs and hind legs closely approximate a square</p>	It will be ascertained by BOOs during visual inspection. Technical member of the BOO will ascertain the breed characters.	
3.	<p>Distinguishing characters:-</p> <p>The head is clean cut and strong without heaviness, overall size in proportion to the body. It shows alertness, attention and readiness for activity and gaze is intelligent and questioning. Eyes are brown, preferably dark brown, medium size, slightly almond shaped, not protruding. Eye rims are black. The ears approach the shape of an equilateral triangle and are stiff, erect, and in proportion to the head in size. The outer corner of the ear should not come below the centre of the eye. The top of the skull is flattened rather than rounded with the width approximately the same as the length but no wider. The stop is moderate. The muzzle is moderately pointed, avoiding any tendency to snippiness, and approximately equal in length to the top skull. The basic colouring is a rich fawn to mahogany, with black tips on the hairs giving an overlay appearance. The mask and ears are black. The coat should be comparatively short, straight, hard enough to be weather resistant, with dense undercoat.</p>	BOOs will confirm it during visual inspection. Technical member of the BOO will ascertain the breed characters.	

4.	<p>Height, Weight and Colour:-</p> <p>(i) Height Male – 23 – 26 Inches Female – 21 – 24 Inches</p> <p>(ii) Weight Male & Female – 23 – 35 Kg Female – 23 – 36 Kg</p> <p>(iii) Colour – Rich flawn to mahagony with black tips on the hairs giving an overlay appearance. The mask and ears are black</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (withers). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOOs will ascertain weight of Dog on weighing machine</p> <p>(iii) BOOs will confirm the colour during visual inspection</p> <p>(iv) Technical member of the BOO will ascertain the breed characters.</p>	
5.	<p>Age :- In case of import, maximum age is 36 months. Whereas in case of local procurement, maximum age is 24 months.</p>	<p>(i) In case of local purchase, BOOs will ascertain the age of dog from KCI certificate or any other KCI affiliated Kennel clubs.</p> <p>Whereas, in case of import, firm to provide certificate from respective Organisation to ascertain the age. In addition, dentition of animal and other age mile-stones will be determined by the Vet Officer.</p>	
6.	<p>Working traits :-</p> <p>i) The personality and behaviour traits of dogs should comprise of affability, confidence control aggression, environment stability, physical and social engagement.</p> <p>(ii) The dog breeding stock should qualify K9 BAT (Behavioural</p>	<p>i) & ii) Behavioural traits will be ascertained by BOOs through K9 BAT.</p> <p>(iii) BOOs will check IPO/</p>	

	<p>Assessment Test).</p> <p>The records of the breeding organisations to be checked are mainly :-</p> <ol style="list-style-type: none"> Pedigree records of Dam and Sire Medical fitness certificates and vaccination records of the litter. Previous records of pups born to concerned Dam and Sire supplied to any security organisation in India or abroad. Any other documents required to ascertain QR/TDs of the dogs. All the pups from a single litter should be at one place. <p>iii) KNPV and NVBK registration is required in case of import of dogs only.</p> <p>iv) In case of local purchase from India, working traits should be determined by BOOs through K-9 BAT.</p> <p>(v) In case of import, the male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>IGP/NVBK/KNPV /Schutzhund certification etc.</p> <p>(iv) BOOs will ascertain through K9 BAT.</p> <p>(v) BOOs will check records of the breeding organisation. Draft QR/TDs of Belgian Shepherd Malinois Pups

Sl No.	QRs	TDs	Vendor's Comments
1.	<p>General Requirement BSM Pups are required for dual task of detection and patrol. The potential pup should be from either of the following sources:-</p> <p>a) Established Police / Military Working Dog centres of foreign countries / India. b) From open market of foreign countries. c) From open market within India.</p>	To be ascertained by the BOOs.	
2.	<p>Belgian Shepherd Malinois Canine breed puppy of age :-</p> <p>(i) 08 – 14 weeks (ii) 14 – 24 weeks</p> <p>User agency should specify the age requirement at the time of indenting.</p>	The BOOs should confirm by checking the registration certificate and by physical observation.	
3.	<p>General appearance :- Well balanced dog, stands squarely on all fours and viewed from the side, the top line, four legs and hind legs closely approximate a square</p>	It will be ascertained by BOOs during visual inspection.	
4.	<p>The pedigree tree upto previous 3 generations should be provided by the vendor / supplier.</p> <p>The vendor / supplier should provide KCI registration / recognised breed registration agency certificate about Pedigree tree.</p>	The BOOs should confirm this by checking the registration certificates of pups and those of Grand parents of the pups supplied.	
5.	<p>Distinguishing characters:- The head is clean cut and strong without heaviness, overall size in proportion to the body. It shows alertness, attention and readiness for activity and gaze is intelligent and questioning. Eyes are brown, preferably dark brown, medium size, slightly almond shaped, not protruding. Eye</p>	BOOs will confirm it during visual inspection.	

	<p>rims are black. The ears approach the shape of an equilateral triangle and are stiff, erect, and in proportion to the head in size. The outer corner of the ear should not come below the centre of the eye. The top of the skull is flattened rather than rounded with the width approximately the same as the length but no wider. The stop is moderate. The muzzle is moderately pointed, avoiding any tendency to snippiness, and approximately equal in length to the top skull. The basic colouring is a rich fawn to mahogany, with black tips on the hairs giving an overlay appearance. The mask and ears are black. The coat should be comparatively short, straight, hard enough to be weather resistant, with dense undercoat.</p>		
6.	<p>Height, Weight and Colour-:</p> <p>(i) Height</p> <p>a) 08 - 14 weeks 12 to 18 inches</p> <p>b) 14 - 24 weeks 18 to 22 inches</p> <p>(ii) Weight</p> <p>a) 08 - 14 weeks 08 to 12 Kg</p> <p>b) 14 - 24 weeks 12 to 20 Kg</p> <p>(iii) Colour – Rich fawn to mahogany with black tips on the hairs giving an overlay appearance. The mask and ears are black</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOOs will ascertain weight of Dog on weighing machine</p> <p>(iii) BOOs will confirm the colour during visual inspection</p>	

7.	The puppy should have right temperament and aptitude for inducting into PSK training.	The BOOs should conduct aptitude test of the puppy on following aspects :- a. Social attraction b. Following c. Restraint d. Social Dominance e. Elevation Dominance f. Retrieving g. Touch sensitivity h. Sound sensitivity i. Sight sensitivity j. Stability As per the prescribed procedure (VOLHARD's Puppy Aptitude Test)	
8.	Veterinary Examination : The pup should be veterinary sound.	Vet Officer of BOOs will ascertain soundness.	
9.	Vaccination and Miscellaneous Health Issues i) The pup should not develop any genetic disorder which comprises of hip dysplasia, elbow dysplasia, hereditary epilepsy and progressive retinal atrophy etc. for minimum 6 (Six) months from date of delivery regarding any of the above mentioned genetic disorders and replace the dog with similar specifications in the event of any of these genetic abnormalities surfaces during this period. This replacement should be free of cost except transportation cost which is chargeable based on actual expenditure. (ii) The pup should be duly immunised against common canine infectious diseases and apparently free from infectious & contagious diseases which comprises of Canine Parvo, Distemper, Hepatitis, Leptospirosis, Corona, Para-influenza, kennel cough and Rabies. (iii) The pup should be free from any skin disorder like	-	

<p>dermatitis, folliculitis, seborrhea, scabies, sarcoptic & demodectic mange, fleas, ticks infestation, tumour, granulomas, squint eyes, running nose, anal sac disease or any other fungal / bacterial infections.</p> <p>(iv) The clinical and laboratory examination of the candidate pups should be carried by the vendor within previous 10 days from the date of examination from an ISO 17025 / NABL accredited veterinary laboratory with regards to complete blood count (CBC), biochemistry profile with regards to liver and kidney function tests, lipid profile and heart worm test.</p> <p>v) Radiological examination and any other record to ensure that the pup have not undergone any surgical intervention.</p> <p>vii) The pup must comply with all mandatory quarantine norms of both exporting and importing countries.</p> <p>viii) The puppy should be guaranteed for six months by the breeder / supplier.</p>
