Internal:
DIG (IT) Dte Genl CRPF along with a copy of draft QRs of “Breeding Stock of Belgian Shepherd (Malinois) Breed” for hoisting in CRPF Website for 15 days (i.e. from 27/08/2020 to 10/09/2020) for inviting industry/vendors comments (Encls: 02 pages).
Draft QRs of “Breeding Stock of Belgian Shepherd (Malinois) Breed” prepared by DB&TS CRPF Taralu

a) Breed – Belgian Shepherd (Malinois).

b) Age:
   Male should be more than 2 years and less than 4 years on the date of purchase – sired minimum 3 litters.
   Female should be more than 2 years and less than 4 years on the date of purchase – Whelped minimum 1 litter.

c) The details about the dam and sire of both male and female dogs to be provided by the vendors:
   c.1) Total no. of litters
   c.2) No. of puppies in each litter

d) The supplied dog should not be in-bred. This will be confirmed by examining the pedigree record of last three generations to be provided by the vendors during PDI.

d) We are already having stock and progeny of Malinois procured from Indian breeders, therefore, the dogs to be procured should not be from the same pedigree. For this purpose the pedigree of the breeding stock of DB&TS should be clearly mentioned in the tender notice.

e) The dog should possess the following traits:
   1. Colour: Sable (Rich fawn/ mahogany with black tipped hairs)
   2. Mask: Melanistic (Black in colour)
   3. Ears: Erect and triangular shape.
   4. Body: Lean & muscular. The back must be straight without any apparent defect.
   5. Coat: Dense, short, flat, straight, shiny and healthy.
   6. Temperament: Active, intelligent, alert and energetic.
   7. Fore limbs and hind limbs should be parallel.
   8. Body should be square.
   9. Height should be as below:
      i) Male: 24” to 26”
      ii) Female: 22” to 24”

f) The dogs must be free from all genetic diseases like hip dysplasia, elbow dysplasia, progressive retinal atrophy etc.

g) The dogs must be free from any contagious or infectious diseases such as Canine distemper, Para-influenza, Parvo-virus, Leptospirosis, Corona, Hepatitis, Rabies, Herpes, Demodicosis and Scabies.

h) The dogs must be vaccinated and protected against diseases like Canine distemper, Para-influenza, Parvo-virus, Leptospirosis, Corona, Hepatitis, Rabies, etc. as per global standards. Certificate to this effect with details of vaccination in respect of each dog is to be provided by the supplier.
i) Health and treatment records of the dogs should be provided by the supplier which must include Haematological parameters (Complete Blood Profile), Bio-Chemistry analysis, Liver and Kidney function tests, radiograph of Hip, Elbow and chest, record of surgeries that the dog has undergone, if any.

j) All dogs must be registered with Kennel Club of India (KCI) or with members of Federation Cynologique Internationale (World Canine Organisation) or KNPV/Schutzhund, IPO, IGP in case of imported dogs. Registration certificate of the dogs should be provided by the vendor and the dog must be impregnated with the relevant micro-chip.

k) The bitch must have delivered at least one litter. Certificate from kennel club of respective country or its affiliated members to this effect (inspection certificate of pups) must be provided by the vendor.

l) The dog must be registered with Federation Cynologique Internationale (World Canine Organisation) or KNPV/Schutzhund, IPO, IGP certificate (inspection certificate of pups) to this effect must be provided by the vendor.

m) Estrous record of the bitch must be provided by the vendor.

n) The male dog must have sired at least three litters. The KCI or Federation Cynologique Internationale (World Canine Organisation) or KNPV/Schutzhund, IPO, IGP certificate (inspection certificate of pups) to this effect must be provided by the firm.

The female dog must have whelped at least one litter. The KCI or Federation Cynologique Internationale (World Canine Organisation) or KNPV/Schutzhund, IPO, IGP certificate (inspection certificate of pups) to this effect must be provided by the firm.

o) Breeding fitness certificate for each dog by a Government Veterinarian having specialization in Veterinary Gynecology to be provided by the vendor.

1. Semen analysis reports of male dog
2. Genital tract ultra-sonography of female dog

p) The dogs should be guaranteed for 60 days post-delivery against above mentioned infectious, contagious or genetic diseases. With respect to genetic disorders the related tests will be conducted at our end within the period of 60 days of delivery. In case, any disease or defect is noticed, the dog will have either to be replaced by the supplier free of cost or the cost of such dogs may be refunded by the supplier. In case of replacement, the replaced dog must also meet all the requirements of the original dog.

q) All dogs must be subjected to prevalent quarantine norms both in the country of origin as well as in India, in case of import.

r) The dogs must be delivered at consignee’s location i.e. Dog Breeding and Training School, Taralu, Bangalore, Karnataka, India at the risk and cost of the suppliers.

s) Above parameters and traits will be judged by the Board of Officers to be detailed by the purchaser. The Board of Officers will examine the provided documents, parameters and working traits of selected adult dogs at the time of pre-dispatch inspection.
