Key Features of the Portal

Facilitating Obscene Content Removal/Blocking

Facilitating blocking/ removal of Obscene content reported

Cases dealt by States/UTs Police for redressal

Complaints reported in the portal are dealt by the concerned States/UTs police authorities for redressal

Upload evidences/ URL Link alongside complaint

Complainants can attach evidences/ URL links in the portal

Ease of reporting

Ease of reporting of cybercrimes from anywhere in India

Anonymous Reporting

Provision of anonymous reporting of complainants pertaining to child pornography and rape/gang rape videos

Status Tracking

Citizen can track the status of their complaints when reported via "Report & Track"

To address the growing menace of cyber crimes against women & children like Obscene Videos, Rape & Gang-Rape Videos/ Images & Child Pornography, the Ministry launched a portal (www.cybercrime.gov.in) on 20th September 2018

“

INDIA IS MOVING FROM
WOMEN DEVELOPMENT TO
WOMEN-LED
DEVELOPMENT.”

-Shri Narendra Modi

ABOUT US

WOMEN SAFETY DIVISION

MHA has set up a new 'Women Safety Division' on May 28, 2018 to strengthen measures for safety of women in the country and instil greater sense of security in them through speedy and effective administration of justice in a holistic manner and by providing a safer environment for women. The new Division is responsible for policy formulation, planning, coordinating, formulating and implementing projects/schemes to assist States/Union Territories to achieve this objective, as also prison reforms, anti-human trafficking and related subjects. This, inter-alia, includes increased use of IT and technology in criminal justice system and enabling a supportive ecosystem for forensic sciences and crime & criminal records.

THE SUBJECT MATTERS DEALT IN THE WOMEN SAFETY DIVISION INCLUDE:

1. Coordination and implementation of projects being undertaken in MHA for enhancement of safety of women in the country (Emergency Response Support System, Safe City projects etc);
2. IT interventions for increasing efficiency in delivery of criminal justice (Crime and Criminal Tracking Network and Systems-CCTNS, Inter-operable Criminal Justice System-ICJS, Investigations Tracking System for Sexual Offences-ITSSO, National Database on Sexual Offenders-NDSO etc);
3. All matters relating to Directorate of Forensic Science Services and its affiliated Central Forensic Science Laboratories, Lok Nayak Jayaprakash Narayan National Institute of Criminology and Forensic Sciences and administrative and financial matters relating to Central Forensic Science Laboratory of CBI;
4. Crime statistics;
5. All matters relating to National Crime Records Bureau;
6. Crimes against women and children, members of scheduled castes, scheduled tribes, elderly persons and other vulnerable groups, but excluding crime against minorities;
7. All matters relating to Trafficking in Persons and Smuggling of Migrants; and the two protocols of United Nations Convention against Transnational Organized Crime (UNCTOC) namely, the 'Protocol to Prevent, Suppress and Punish Trafficking in Persons, especially Women and Children' and the 'Protocol against the Smuggling of Migrants by Land, Sea and Air', excluding legislative, rehabilitation, welfare and other promotional aspects specifically dealt with by the Ministry of Women and Child Development;
8. All matters relating to Prison Reforms, Correctional Administration, Prisons/Prisoners legislation, Identification of Prisoners/Convicted and Suspected persons legislation, Repatriation of Prisoners Act, 2003, Transfer of Sentenced Persons agreements and matters related thereto;
9. Poisons Act, 1919.

Delhi Police 'Safety of Women' Scheme

7,36,294

Total number of Women/Girls imparted self defence training

(FY 2018-19 & FY 2019-20 as on 30.09.2019)

Crime and Criminal Tracking Network and Systems (CCTNS)

15,842 Total number of PS in States/UTs

14,925 Total number of PS where CCTNS Software is deployed

2,68,38,507 Total number of FIRs entered using CCTNS

14,522 PS entering 100% FIRs

(FY 2018-19 & FY 2019-20 as on 30.09.2019)

Training on Forensic evidence collection, handling & transportation in sexual offences (NIC&FS)

1,130

Number of Medical Officers trained

4,658

Number of Investigation Officers & Prosecution Officers trained

(FY 2018-19 & FY 2019-20 as on 30.09.2019)

112 India App Downloads

2,85,470

Total number of app downloads (android)

30,855

Total number of app downloads (IOS)

(FY 2018-19 & FY 2019-20 as on 30.09.2019)

Sexual Assault Evidence Collection (SAEC) Kit

3,120

Distributed to Government Hospitals, Regional & State Forensic Labs across the country

(FY 2018-19 & FY 2019-20 as on 30.09.2019)

NEWS BRIEFS

WELCOMING NEW MINISTERS

On Saturday, 1st of June 2019, two days after the swearing ceremony of the cabinet, Shri Amit Shah, took charge of the Union Ministry of Home Affairs. The Union Home Secretary, Shri Rajiv Gauba, welcomed him. Along with Shri Amit Shah, two new Ministers of State for Home Affairs were also inducted, namely Shri Nityanand Rai and Shri G Krishna Reddy. Shri G Krishna Reddy, previously the state president for the BJP in Telengana, has been allotted the portfolio of the Women Safety Division.

Shri. Amit Shah took oath as Union Home Minister in Modi Government.

Shri. G Krishna Reddy took oath as Minister in Modi Government.

COMMENCEMENT OF ICJS PILOT IN NEW DELHI

Inter-operable Criminal Justice System (ICJS) is a common platform for information exchange and analytics of all the pillars of the criminal justice system comprising of Police, Forensics, Prosecution, Courts & Prisons. Invested under the CCTNS project of the MHA, the ICJS enables a nation wide search on police, prisons & courts databases across all States/ UTs in the country. Consumption of data between pillars is also being enabled. The *raison-d-etre* of ICJS is to reduce errors and time taken in sharing of necessary information between the pillars, which often lead to larger challenges like longer duration of trials, poorer convictions, transit losses of documents etc. Some other critical benefits arising out of the ICJS ecosystem is usable analytics products like the National Database on Sexual Offenders (NDSO) to identify & track repeat and habitual sexual offenders. The NDSO has become an integral part of pre-employment character & antecedent verifications, thereby reducing the opportunity for sexual crimes in several sensitive jobs since its launch in September 2018.

To expand the footprint of ICJS, a pilot was commenced in New Delhi to achieve the following:

S. No.	Features
1	Nationwide search of Police Database
2	Linking of databases from all pillars – Police, Forensics, Prosecutors, Courts & Prisons
3	Search and consumption of data across all pillars
4	To & Fro exchange of information between Police & Prosecutors (Legal Advice on Chargesheet)
5	Consumption of profiling data based on key identifiers – FIR number, Case number, Prisoner number etc.
6	Seamless access to Arms License Information System (ALIS) data by all pillars
7	Training of Officers from Prosecution & Forensic Laboratories
8	Consumption of data by Courts

Interoperable Criminal Justice System

Pan India Search 🔍

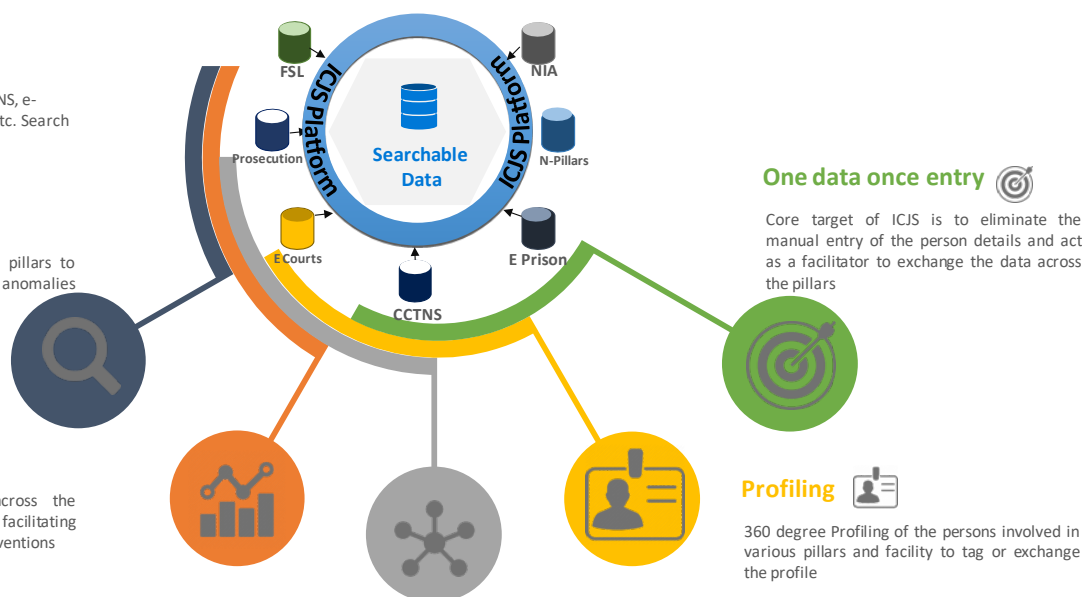

Search across the pillars data of CCTNS, e-Courts, e-Prisons, Prosecution, NIA etc. Search empowered by Phonetics and NLP

Pillar Analytics 📊

Analyze the data of the individual pillars to understand the trends, patterns, anomalies etc. in the network

Exchange Data 🌐

Secured information exchange across the pillars through secured protocols facilitating data exchange without manual interventions

. Conceptual diagram of ICJS implementation

NEW EQUIPMENT AT CFSL CHANDIGARH

DNA evidence has become instrumental in resolution of cases ranging from sexual assault to paternity suits. To ensure timely investigations and on the road to establishing a centre for excellence, CFSL at Chandigarh has procured the following equipment:

S. No.	Description of Equipment	Number of Units	Total Cost
1	Genetic Analyzer 3500	05	Rs. 7.61 Crore
2	PCR	18	Rs. 27.40 Lakh
3	Automated DNA extraction System	05	Rs. 43.60 Lakh
Total Cost of Equipment			Rs. 8.32 Crore

The Ministry has sanctioned a cost of Rs. 131 Crore for upgrading the DNA Analysis labs in State & Regional Forensic Labs (SFSL & RFSLs).

CCTNS – PILOT PROJECT FOR CONNECTION OF RURAL POLICE STATIONS WITH GRAM PANCHAYATS THROUGH THE OPTIC FIBRE NETWORK OF BHARAT BROADBAND NETWORK LIMITED (BBNL)

The Crime & Criminal Tracking Network and Systems (CCTNS) project of the MHA has achieved 93.9% penetration (connectivity among Police Stations across the country) as on 31.03.2019. However, access speeds have been slow, with most of the Police Stations connected at a base level of 512 Kbps. Over time, the bandwidth was upgraded to 2 Mbps and has since been achieved in over 9,000 Police Stations across the country.

Bandwidth is also a determinant of usage. The higher the speed of connectivity, the better should be the usage of CCTNS at the Police Stations. Primarily, data is entered into Forms at the Police Stations, information from which is aggregated to inform policy, allocate resources, develop plans and even deploy training programs. Additionally, CCTNS supports Investigation Officers in detection of crimes through features like Search facility (at multiple levels covering Districts, State & Nation-wide), and supports oversight through structured MIS

reports and role-based dashboards.

To address this challenge, the Ministry of Home Affairs, in association with the Bharat Broadband Network Limited decided to connect rural Police Stations with the national optic fibre cable network (BharatNet) connecting all Gram Panchayats. A pilot of the project was implemented in the States of Uttar Pradesh, Uttarakhand, Himachal Pradesh and Tripura in April 2019. The following were chosen as the Pilot parameters:

1. Establish connectivity
2. Confirm bandwidth (and time taken for Upload/ Download)
3. Ability to ping Server at State Data Centre (SDC) of CCTNS through VPN
4. Enter one record into the General Diary of the PS
5. Access State search portal at the PS

The test (PoC) was completed in the following locations successfully:

S.No.	State	District	Police station	Bandwidth	Upload/Download time taken
1	Uttar Pradesh	Maharajganj	Kotwali	10 Mbps	N/A
2	Uttarakhand	Haridwar	Khanpur	10 Mbps	20s/ 22s
3	Uttarakhand	Haridwar	Bahadarabad	10 Mbps	18s/ 20s

CCTNS AND THE RANKING OF THE BEST POLICE STATIONS OF INDIA

Each year, the Ministry of Home Affairs conducts a study and ground survey to identify the best police stations in the country. The study for the year 2018-19 was different from all the years in the past. For the first time, Crime & Criminal Tracking Network and Systems (CCTNS) formed the core of the selection process, thereby introducing a new level of objectivity and analysis into the process of ranking.

Briefly, earlier, States/ UTs were required to nominate Police Stations. The nominated Police Stations then were assessed through on-ground surveys and citizen feedback on a multitude of parameters like cleanliness, how hospitable was the staff, how receptive was the officers, how prompt and responsive was the police in cases and situations of crises among others. The surveys would be implemented by a third-party agency to maintain objectivity and consistency in the evaluation process. The chink in the armour was 'nomination'. Based on subjective analysis in addition to objective periodic reviews, the state leadership team in the Police would choose and nominate Police Stations for the sampled surveys. To introduce greater objectivity and fairness in the process, this time CCTNS data inputs were used. The timely & regular entry of data into the CCTNS was a critical component in the selection of Police Stations for on-ground survey. The criteria for selection was identified as:

1. Recording of sexual offences against women & children and resolution of cases within 60 days from registration.
2. Recording and resolution of crimes against SC & ST.
3. Recording and resolution of property offences.

For the above, compiled database of the CCTNS was analysed to shortlist the top performing 3 Police Stations in States with over 750 Police Stations, 2 Police Stations from other States & NCT of Delhi and 1 each from each of the UTs. The shortlisted Police Stations were then subjected to on-ground survey and citizen assessment. Another success in the process was the participation of all the States & UTs in the ranking exercise.

The top 3 Police Stations in the country for 2018 are:

First: Kalu Police Station, Bikaner, Rajasthan. The Police Station scored the highest in both the parts of the assessment process. The PS has a woman helpdesk, is clean, and offers clean drinking water, tea and wi-fi to visitors. The facility also has recreation areas for staff.

Second: Campbell Bay Police Station, Nicobar, Andaman & Nicobar Islands. The PS scored second highest in both parts of the assessment process. The PS is clean, has a woman helpdesk, a child friendly room, IT room and waiting area for complainants and visitors.

Third: Farakka Police Station, Murshidabad, West Bengal. This Police Station was ranked 5th in both parts of the assessment process. It has several plusses, including air-conditioning, a library, gym and playground with adequate space for public-police interactions. It also has CCTV cameras, fire safety equipment and oxygen cylinders for emergencies.

Former Home Minister Shri Rajnath Singh awarding the trophies to Police Officers of Top Three Police Stations of India in 2018 at the DGs Conference.

DISPATCH OF 3,120 SAEC KITS BY BPR&D

The Directorate Forensic Sciences Services (DFSS) and the Central Forensic Sciences Laboratory, Chandigarh have developed an evidence collection, handling and transportation kit for sexual offences, titled the Sexual Assault Evidence Collection (SAEC) Kit. To ensure quick adoption and usage of the SAEC Kit, the MHA, through the Bureau of Police Research & Development (BPR&D) has produced 3,120 kits and dispatched them to Government Hospitals, Regional & State Forensic Labs across the country. In addition, the MHA has identified a panel of vendors, who have since registered as suppliers in the Government e-Marketplace (GeM) to facilitate procurement by State Police, Forensic Labs and Government Hospitals for subsequent use.

LAUNCH OF 112 SERVICES IN NEW DELHI & CHANDIGARH

CHANDIGARH

Hon'ble Union Minister for Home Affairs, Shri Amit Shah launched three citizen centric services of the Chandigarh Police, in Chandigarh on 20th September 2019. The services include the Emergency Response Support System (ERSS - Dial 112), 'E-Beat Book' System and the 'E-Saathi App'.

The 'E-Beat Book' is a web and mobile based application which will ease the collection, updation and analysis of the information related to crime and criminals in a real time. The E-Beat Book would be linked with Crime and Criminal Tracking Network & Systems (CCTNS), which would help in a real time updation of crime/criminal data.

The 'E-Saathi' App would help the general public, including senior citizens, to remain in touch with the police and also give suggestions to facilitate participative community policing ('Your Police at Your Doorstep' initiative).

DELHI

Hon'ble Minister of State for Home Affairs Shri G Kishan Reddy launched the 112 services in Delhi on 25th September 2019. The main Emergency Response Centre has been set up in Shalimar Bagh, New Delhi. Alongwith ERSS services, Hon'ble Minister also launched PRAKHAR Van which is a street crime patrol van, for patrolling at crime hot spot locations. PRAKHAR Vans are different from PCRs as these vans carry more firepower and are equipped with modern technology. Initially, one van will be deployed in each district of Delhi.

LAUNCH OF 3 NEW COURSES BY NIC&FS

Ministry of Home Affairs has started three Postgraduate Diploma courses in the advanced areas of Security Management, Victimology & Victim Assistance and Cyber Crime & Law from Academic year 2019-2020. All the three courses will help manning the Criminal Justice System by providing a specialized and trained taskforce. The course curriculum is a blend of both theoretical and practical knowledge covering the aspects required on the field. The course will be delivered with the help of academicians and experts from respective Industries and Non-Governmental sectors. The duration of all the Diplomas is one year. The details of the courses are:-

1. Post Graduate Diploma in Security Management
2. Post Graduate Diploma in Victimology & Victim Assistance
3. Post Graduate Diploma in Cyber Crime & Law

The courses are affiliated to GGSIP University and the classes will tentatively commence in the month of August in Lok Nayak Jaya Prakash Narayan National Institute of Criminology & Forensic Science. The total intake in each course is 25 i.e. 20 seats for open candidates and 5 for in-service Government Officers. The students can also avail the Hostel facility within NICFS premises.

SUCCESS STORIES

SUCCESS STORIES OF ERSS

UT: ANDAMANS

Instance 1:

A bystander called the ERC at 9:00pm on 9th June 2019, with information on a teenage girl who was alone and crying outside movie theatre in Prothrapur. She was also refusing to converse with anyone. On receiving the information, the ERC dispatched an All Women Patrol vehicle from PS Pahargaon. In conversation with a lady officer, it was discovered that she was a resident of Ferrarpur and had missed her last bus. The Police then dropped her at her residence.

Instance 2:

In another instance on 22nd March 2019, a distressed parent from Chunnabhata Bambooflat, a very remote location with no vehicular service after dusk, called the ERC after 10 pm, needing assistance for his 2-year-old son, who was experiencing breathing difficulty. The dispatcher located an Ambulance from CHC Bambooflat, which reached Chunnabhata in less than 15 minutes. Timeliness in reaching the residence, immediate emergency assistance and transfer to CHC Bambooflat saved the life of the child.

STATE/ UT: UTTARAKHAND

Instance 1:

On 10th April 2019, Supriya boarded a bus from Haridwar, UK to Panipat, Haryana. Within a few moments, the conductor of the bus and a few miscreants started teasing and abusing her. A person, who came to her assistance was abused, beaten and thrown out of the bus. She called 112, fearing escalation. A team from Roorkee was dispatched which located the bus, stopped it and booked the conductor and other miscreants. As Supriya was the lone woman in the bus, a potentially threatening situation was hastily neutralized by the timely action of Roorkee Police.

Instance 2:

On 20th of April 2019, a boy working on National Highway survey & repair accidentally fell from the hillside. One of the other workers called 112. The time was 2 pm. A team from the local police, on reaching the spot discovered that the boy was trapped in a narrow valley, inaccessible by foot or vehicle. The local police and the ERC then engaged the SDRF to mount a rescue operation. The boy was finally extricated from the precarious situation in two hours, given first aid and sent to AIIMS, at Rishikesh for medical assistance. Thus a life was saved by the timely engagement and interaction of two services of the State.

STATE: TELENGANA

Instance 1:

On 7th of June 2019, the ERC received a call from Mr.Komuraiah at 6:20 pm about his sister-in-law being attacked with a knife. Dispatch from the Thorur PS was initiated at 6:24 pm and the First Response Vehicle reached the location within 5 minutes. The offenders were immediately arrested and the lady was saved by timely action of the Police.

Instance 2:

On 3rd May 2019, at 9.08 pm, a call was received from Mr.Raju about a girl being eve-teased by a group of boys. The location was sourced and a dispatch was initiated from the Sircilla PS at 9:10 pm. The First Response Vehicle reached the girl at 9:15 pm, arrested the boys and thus prevented any escalation in crime.

Instance 3:

On 15th of June 2019, at 11:15 pm, a call was received about theft of a vehicle from just outside the residence of the caller. Immediately, the ERC alerted the relevant PS and informed all patrolling vehicles in the vicinity of the incident. As a result, the stolen vehicle was tracked down within 30 minutes and restored to its owner.

STATE: CHHATTISGARH

Instance 1:

On 12th May 2019, at 4:30 pm, a bystander informed the ERC about a pregnant woman moaning in labour pain near the Forest Depot in DisttKorba. Dispatch was initiated within 3 minutes and the First Response Vehicle reached her location within a few minutes. With a nurse and her husband in the vehicle, the lady gave birth to a healthy child on the way. Eventually, the FRV took them to Ayushman Wellness Centre where both mother & child were provided with necessary medical treatment.

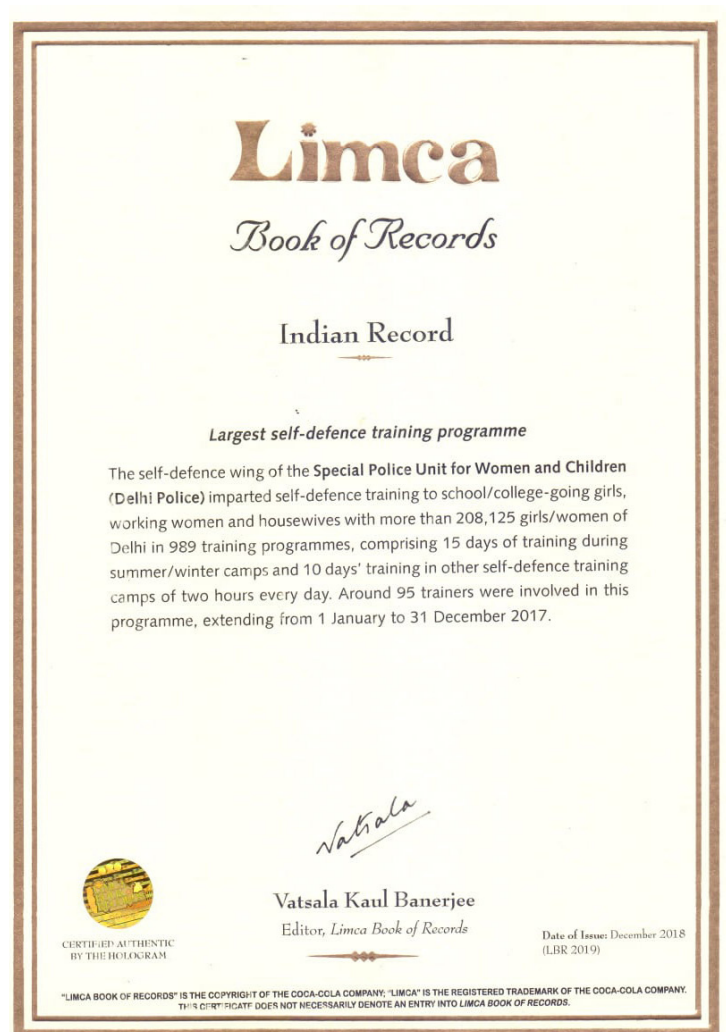

Instance 2:

On 17th of June 2019, at 2:00 pm, a bystander called the ERC informing them about a group of boys teasing a lone girl near Champa railway station. A vehicle was dispatched immediately, which reached the location (a deserted road) within a few minutes. On seeing the vehicle, the boys on 3 motorbikes, fled the scene. The girl was unconscious. When revived, the girl confirmed that she was en-route to Bilaspur from Champa when the boys surrounded her autorickshaw suddenly. In the melee, she had fallen down unconscious. Thus timely response by the Police prevented escalation in crime. The victim was then safely escorted to the railway station and the Police tracked her onward journey to Bilaspur, ensuring her safety.

SPUWAC'S LIMCA RECORDS & SELF DEFENCE TRAINING

Special Unit for Women & Children (SPUWAC) of Delhi Police has been conducting self-defence training camps for women of vulnerable age groups and localities under the Sashakti scheme. In this calendar year 2019, more than 27,000 women have participated in these camps. In the year 2017, the SPUWAC trained more than 2,80,000 women in such training camps, which has been recognized by the Limca Book of Records of the year 2017. So far, over 1.1 Million women have been trained in self-defence during this program.

Limca Book of Records accomplished by Special Police Unit for Women & Children - Delhi Police

Limca Book of Records accomplished by Delhi Police - South East District

SUCCESS IN USING CCTNS IN ANTECEDENT VERIFICATIONS

In the first 15 days of July 2019, Tamil Nadu State Police received requests for more than 28,800 verifications prior to the issuance of Passports, from the Ministry of External Affairs. Prior to physical verifications, Tamil Nadu Police used CCTNS portal (Accused Name Search) and discovered criminal backgrounds of 80 applicants. 3 of the 80 were found to be involved in murder cases, 39 in hurt cases, 5 in theft cases and 33 in petty offences ranging from road accidents to cheating or rioting.

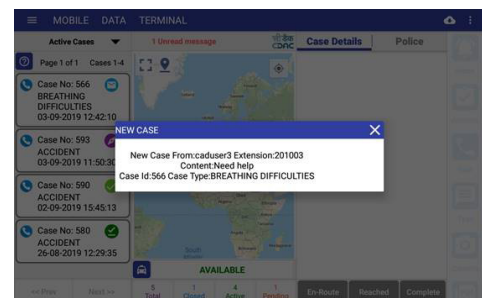

In another case of antecedent verification, a gun license application received by Tamil Nadu Police, Officer of the Thoothukudi district, PS Kovilpatti East, discovered applicant's involvement in rioting, extortion and murder cases. Applicant had also been convicted in the rioting case, while the murder case was pending trial.

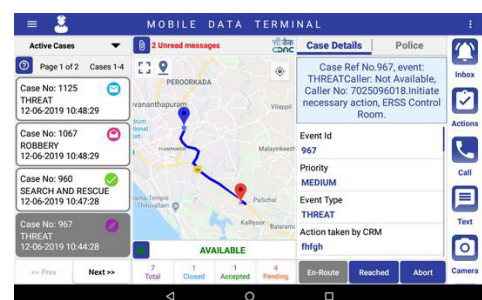

C-DAC LAUNCHES THE MDT AS A SMARTPHONE APP

One of the constraints impacting delivery of timely assistance by State Police under the ERSS project is scalability of MDT (Mobile Device Terminal) enabled First Response Vehicles (FRVs) to meet the peak hour escalation in demand for assistance by citizens.

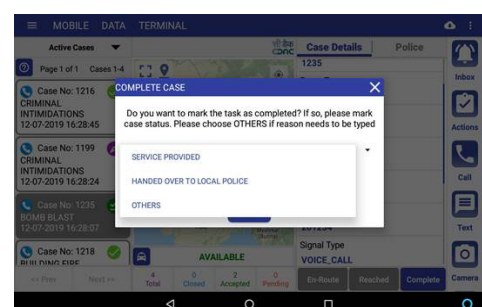

To address this challenge and helping the Police in deploying larger numbers of FRVs, C-DAC – the Total Service Provider (TSP) of the MHA (Thiruvananthapuram site), has developed a mobile app that transforms the humble smartphone into an MDT. This capacitates the frontline staff of the Police to become a first responder, using any vehicle available in the Police Station or in the vicinity. Telangana State Police has already employed the MDT App with great success; by expanding its number of FRVs to almost 1,500 by mobilizing its 'Rakshak' fleet of smart-phone wielding motorbike borne policemen & women from a small number of 192 MDT enabled vehicles. This 400% expansion in numbers is employed to address the peak hour demand effectively and efficiently.

IP univ offers 3 new courses on cybercrime, security, victimology

Mohammad Ishaq
@thesinghgroup.com

New Delhi: College grads now have a chance to learn about crime victims, information security, learn methods to provide security and prevent cybercrime as Guru Gobind Singh Indraprastha University (GGSIPU) is set to start three new post-graduate diploma courses in victimology and victim protection, security management and cybercrime and law.

While the admission process for the three new courses started on Thursday, the courses will tentatively begin from August 16 in affiliation with Lok Nayak Jayaprakash Narayan National Institute of Criminology and Forensic Science, which is already offering MA and MSc courses in criminology and forensic sciences. These will cater to not only students, but also go graduates in any discipline from a recognised university with 50% marks to apply for these courses.

However, for the cyber-security course we are looking for students with a computers or information technology background," he added.

"Victimology is a unique course started by us as it is a rapidly emerging field of study with a focus on victims of crime. In India, we have a criminal justice system, but we don't focus on victim justice. We will educate students on how to work with the criminal justice system, welfare groups and NGOs that deal with victim support,"

WHAT'S NEW AT IP UNIVERSITY

1 Victimology and Victim Assistance
Will introduce students to concept of victimisation and address psychological, physical and financial effects on victims
Job prospects: Students can work in the areas of criminal justice, welfare, education and victim support

2 Security Management
Will familiarise students with different types of risks and protective measures for physical and digital security
Job prospects: Students can take up jobs in the security industry or conduct security assessment for institutions, firms, events or manage security of high-profile personalities

3 Cybercrime and Law
Will train students on tools to prevent cyber-attacks and to gather digital evidence without any kind of damage
Job prospects: Students can join in cyber security teams of educational, corporate and government institutions and help make websites secure

Chattoraj said. In the security management course, students will be taught how to manage physical and digital security, while in cybercrime and law they would be educated on evidence handling and collection, investigation of cybercrime and the laws pertaining to them.

Pervin Malhotra, columnist and counsellor, said, "Cyber security is a job-oriented course that will have plenty of openings in law firms and in companies that require security of their websites, databases and digital security. The last date of submission of online application is July 31.

Times of India, Delhi, 19th July 2019

सभी राज्य खोलें केंद्रीय फॉरेंसिक विज्ञान कॉलेज

केंद्रीय गृह मंत्री अमित शाह ने उत्तरी क्षेत्रीय परिषद की बैठक में दिए निर्देश, राज्यों ने रखी अपनी बात

अनुराधा अग्रवाल

पंजाब/राजस्थान/देराचढ़ के सभी राज्यों को अपने-अपने काम से बचाने के लिए केंद्रीय फॉरेंसिक विज्ञान कॉलेज खोलना होगा। उत्तरी क्षेत्रीय परिषद की 29वीं बैठक में केंद्रीय गृह मंत्री अमित शाह ने राज्यों के मुख्यमंत्रियों, मुख्य सचिवों और राज्य पुलिस प्रमुखों को इससे निर्दिष्ट किया। केंद्रीय फॉरेंसिक विज्ञान कॉलेज खोलना एक बड़ा कदम है।

New system will track genuine calls: Police

Team Herald

PANJIM: The launch of the ambitious helpline 112 equivalent to United States' 911 all-in-one emergency services - has been a challenge for the Goa Police considering that missed, accidental or unintentional calls are much higher than genuine calls. The department claims that barely 2-3 % calls are genuine from close to 6453 'Total Landed Calls'. "There have been at least 98 % unintended calls. Actual genuine calls comprise of around 2-3 %," said Superintendent of Police (SP) Pankaj Kumar Singh.

Reacting to the whopping number of unwanted calls, Kumar conceded the problem exists in other States too where the emergency services are in operation. However, he explained that the Interactive Voice Response (IVR) system addresses the issue. The technology has automated the telephone system interacting with the caller to route the call to appropriate recipient via keypad selection.

The ERSS Online Monitoring, installed at the control room, indicated that out of 6453 calls attended till the morning hours of October 9, 114 were 'routed calls', 6339 'drops' and '6183 IVR drops'. On Wednesday morning, the control room received 95 calls of which 19 were missed calls. Chief Minister Pramod Sawant, added that the helpline is connected with police and fire-related help while medical emergency services will be operating through separate lines with any call centre equipped with latest technology and working round the clock. Two centres in Panjim and Margao have been established as part of this new integrated service.

The ERSS single emergency helpline number will replace the existing emergency services numbers - 100 (Police), 101 (Fire) and 108 (Ambulance Services) in phased manner.

Two years ago when the helpline was introduced, the Goa Police were forced to increase their phone lines from 7 to 20. The number of incoming calls has increased and the number of accidental and unintended calls.

CM announces 112 as 'new' emergency number

Team Herald

PANJIM: Chief Minister Pramod Sawant has said the integrated emergency number for police, fire and medical - Dial 112 is expected to reduce crime rate as well as cater to the tourists in distress.

Speaking to reporters after inaugurating the Emergency Response Support System (ERSS) on Wednesday, Sawant added that the service will ensure quick delivery of support system to the citizens.

"The overall crime rate will drop. Similarly, crime against women, children and tourists will also be reduced. We will also provide nearest support system in the shortest span of time to people in distress," he said.

HOW IT WORKS

Superintendent of Police Pankaj Kumar Singh explained that the significant feature of the new system is that a caller would instantly see the details of the caller on the screen as soon as a call is received. The in-built software enables the call taker to find the exact location of the caller on the Geographical Information System (GIS) map. Thereafter, the call will get connected immediately to the nearest emergency vehicle on its Mobile Data Terminal (MDT) without delay. Initially 20 Police Control Room (PCR) vehicles have been fitted with MDTs for immediate dispatch. MDTs will be fitted in all PCR vehicles in due course. The Goa Police is also expected to add more vehicles to its fleet with proposal for nearly 100 vehicles submitted to the government. CM Sawant added that they will upgrade the infrastructure and add vehicles under funds provided by the Centre.

PARTNER PROGRAM

CYBERCRIME PREVENTION AGAINST WOMEN AND CHILDREN

Globally, it is estimated that cyber crime cost over US\$ 5 Billion in FY 2018-19. A large share of this cost is due to malware or economic fraud. But the bigger and silent cyber crime is the unchecked growth in creation, distribution and sales of pornographic material, including videos of rape, gang-rape and child pornography.

To address the growing menace of cyber crimes against women & children like Obscene Videos, Rape & Gang-Rape Videos/ Images & Child Pornography, the Ministry launched a portal (www.cybercrime.gov.in) on 20th September 2018, with adequate back-end provision of Cyber Crime Labs, the capacity to detect crime, block content and/or prevent the circulation of content and initiate criminal proceedings by registering FIRs.

Key Features of the Portal

Facilitating Obscene Content Removal/Blocking

Facilitating blocking/ removal of Obscene content reported

Cases dealt by States/UTs Police for redressal

Complaints reported in the portal are dealt by the concerned States/UTs police authorities for redressal

Upload evidences/ URL Link alongside complaint

Complainants can attach evidences/ URL links in the portal

Ease of reporting

Ease of reporting of cybercrimes from anywhere in India

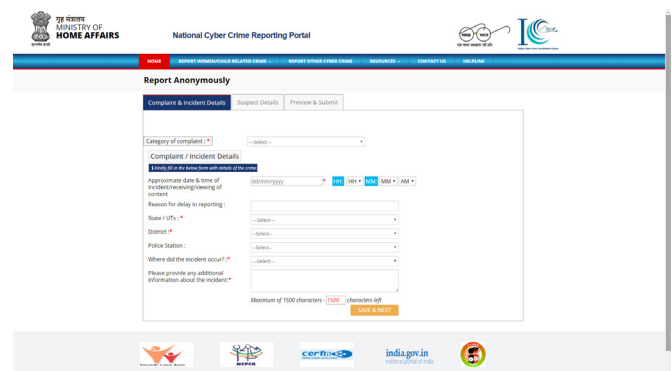

Anonymous Reporting

Provision of anonymous reporting of complainants pertaining to child pornography and rape/gang rape videos

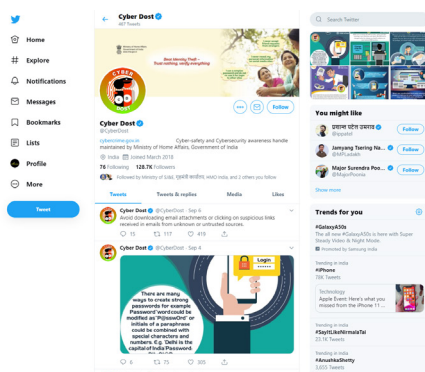

Status Tracking

Citizen can track the status of their complaints when reported via "Report & Track"

Key features of the portal

To report a crime anonymously, citizens need to fill a simple form and attach photos or videos as evidence to support their complaints. Police as first follow-up ensures that the reported content is blocked/ deleted from servers.

Another unique initiative is the 'Cyberdost' Twitter page. Citizens can use this page as well to report complaints or remain updated on steps being taken by the Cyber Crime Cell or follow to receive instructions and suggestions on how to protect oneself from falling a victim to cyber crimes.

MUSINGS FROM STATES

ODISHA'S EXPERIENCE OF ICJS - A TRUE GAME CHANGER

The Inter-operable Criminal Justice System (ICJS), largely remains an unknown initiative, despite its transformative potential. The objective of ICJS is to bring all the pillars of the criminal justice system across the country, e.g. the Criminal Courts, the Police, the prison set up, the prosecution system and the forensic laboratories on a single data grid and to provide for live exchange of information. This is as ambitious a project as Aadhaar and no less significant, though the scale of what is being attempted may not be fully understood as of now.

Various legal black holes have developed in our criminal justice system. Different pillars enter the same data in their respective systems causing wastage, delay and errors. There are serious issues of data integrity and each such discrepancy may be contributing to inefficiency to say the least, or complete subversion sometimes. The entire system continues to be vulnerable to petty corruption. Such is the volume of transactions that senior officials can hardly monitor transactions or prevent malpractice.

Odisha Police started implementing ICJS in April 2019. From 2005, 11.89 Lakh FIRs were registered in Odisha. We have now linked these cases to their corresponding court cases and officers can know the current status of the cases using CCTNS. The e-prison data from Odisha is being cleaned up. The State Forensic Science Laboratory (SFSL) is now fully integrated with CCTNS. Using our mobile App, 'Arakhi' (meaning police), our officers are able to generate a single information docket. The Court Information System (CIS) under the national e-Court Programme and the Core Application System (CAS) under the Crime Criminal Tracking and Networking System

(CCTNS) were developed independent of each other. So there are integration challenges, though they are not intractable as the Odisha experience shows.

Live transfer of data relating to FIRs and Charge Sheets in Odisha is now awaiting approval of the e-Committee of the Supreme Court of India. We have also suggested many value additions to ICJS, e.g. Online dispatch of Warrants and Processes to Police Stations, automatic entry of Court Disposal Orders in CCTNS, Remand and Bail data to Prisons, Release Orders from prisons live transfer to Police, Courts' consumption of Forensic reports online etc. Thereby leaving no scope for suppression or tampering of data. Integrity must be absolute as they involve rights of the accused and affect justice delivery.

ICJS is a true game-changer and can transform the way criminal justice is administered in India. Policy makers will have to provide more resources for ICJS and implement it in mission-mode. No country in this world has developed without creating a robust criminal justice system. Today, reforms in governance are what are needed to fulfill the aspirations of our people, not budgetary provisions. ICJS, the cornerstone in justice delivery must be implemented.
